

Red Hat JBoss Application Administration I (AD 248)

COURSE OVERVIEW:

Red Hat JBoss Application Administration I teaches you the best practices for installing and configuring Red Hat JBoss Enterprise Application Platform (JBoss EAP) 7. Through hands-on labs, learn the essential, real-world tasks that a system administrator needs to know to effectively deploy and manage applications on JBoss EAP.

After completing this course, you should be prepared to take the Red Hat Certified Specialist in Enterprise Application Server Administration exam.

WHO WILL BENEFIT FROM THIS COURSE?

System administrators who are either new to Red Hat JBoss or have experience with Red Hat JBoss Enterprise Application Platform 6

PREREQUISITES:

- Base experience with system administration on Microsoft Windows, UNIX, or Linux®_ operating systems
- Understanding of hardware and networking

COURSE OBJECTIVES:

- Installing and run JBoss EAP 7 in standalone mode and domain mode
- Configuring a domain
- Deploying applications to JBoss EAP 7
- Configuring the datasource subsystem
- Configuring Java Message Service (JMS) and HornetQ
- Configuring the logging subsystem
- Configuring the web subsystem
- Implementing application security in JBoss EAP 7
- Configuring the batch subsystem
- An introduction to clustering

COURSE OUTLINE:

Overview of JBoss Enterprise Application Platform (JBoss EAP)

- Learn the concepts and terminology of JBoss EAP 7.
- Install and run a JBoss EAP instance.
- Understand extensions, profiles, and subsystems.

Configure JBoss EAP in standalone mode

- Run and configure JBoss EAP in standalone mode.
- Configure interfaces and socket binding groups.

Script configure and deploy applications

- Configure JBoss EAP with command line interface.
- Deploying applications in standalone mode.

Configure JBoss Enterprise Application Platform as a managed domain

- Run JBoss EAP as a managed domain.
- Assign a domain controller.
- Configure a host controller and domain controller.

Configure servers in a managed domain

- Manage domain server architecture.
- Configure servers and server groups.

Configure datasources

- Explore the datasource subsystem and configure JDBC drivers, datasources, and an XA datasource.

Configure the logging subsystem

- Configure loggers and logging handlers.

Configure the messaging subsystem

- Explore the messaging subsystem.
- Configure messaging resources, journals, and other settings.

Secure JBoss EAP

- Configure a database security realm, an LDAP security realm, and password vault.
- Secure a JMS Destination.

Configure the Java Virtual Machine (JVM)

- Configure the JVM in standalone mode and in a managed domain.

Configure the web subsystem

- Explore and configure the features of the web subsystem.

Deploy clustered applications

- Explore clustered applications.
- Configure subsystems that support clustered applications and configure load balancing.
- Deploy HA Singleton applications.

Configure the batch subsystem

- Explore and configure batch jobs and batch subsystem.

Discover new features in JBoss EAP 7

- Explore the new features in JBoss EAP 7.
- Migrate JBoss EAP 6 applications to JBoss EAP 7.

Comprehensive Review of Red Hat JBoss Application Administration I

- Review the tasks in Red Hat JBoss Application Administration I.

SUNSET LEARNING INSTITUTE (SLI) DIFFERENTIATORS:

Sunset Learning Institute (SLI) has been an innovative leader in developing and delivering authorized technical training since 1996. Our goal is to help our customers optimize their cloud technology investments by providing convenient, high quality technical training that our customers can rely on. We empower students to master their desired technologies for their unique environments.

What sets SLI apart is not only our immense selection of trainings options, but our convenient and consistent delivery system. No matter how complex your environment is or where you are located, SLI is sure to have a training solution that you can count on!

Premiere World Class Instruction Team

- All SLI instructors have a four-year technical degree, instructor level certifications and field consulting work experience.
- Sunset Learning has won numerous Instructor Excellence and Instructor Quality Distinction awards since 2012

Enhanced Learning Experience

- The goal of our instructors during class is ensure students understand the material, guide them through our labs and encourage questions and interactive discussions.

Convenient and Reliable Training Experience

- You have the option to attend classes at any of our established training facilities or from the convenience of your home or office with the use of our HD-ILT network (High Definition Instructor Led Training)
- All Sunset Learning Institute classes are guaranteed to run – you can count on us to deliver the training you need when you need it!

Outstanding Customer Service

- Dedicated account manager to suggest the optimal learning path for you and your team
- Enthusiastic Student Services team available to answer any questions and ensure a quality training experience
