

## Cisco DNA – Cisco Programmability Fundamentals

### COURSE OVERVIEW:

Cisco Digital Network Architecture (DNA) Programmability is a three-day, instructor-led, introductory Cisco DNA course that will help you to become familiar with the SDN concepts, programmability, and integration that support Cisco and multi-vendor solutions to help usher customers into the new age of Software Defined Networks. Module content includes sections devoted to Programmable Infrastructure Overview, Cisco's Digital Network Architecture, Cisco Programmable Infrastructure, REST APIs and Python learning, Spark API, and much more. See below for additional Cisco Programmability course information along with suggested prerequisites, course objectives, and a description as to who should be attending this course.

### WHO WILL BENEFIT FROM THIS COURSE?

The primary audience for this course is as follows:

- Cisco Systems Engineers
- Channel Partner Systems Engineers
- Field Engineers
- Systems Architects
- IT Managers

### PREREQUISITES:

The knowledge and skills that a learner must have before attending this course are as follows:

- Basic understanding of Enterprise Networking

### COURSE OBJECTIVES:

Upon completing this course, the learner will be able to meet these overall objectives:

- Describe what is SDN and Network Programmability
- Understand the Use Cases and Problems Solved with SDN
- Understand the Digital Transformation and Cisco Digital Network Architecture (DNA)
- Explain an overview of OpenFlow and Network Controllers
- Explain an overview of Human Interaction DevOps-Style
- Understand next steps to get customers ready

### COURSE OUTLINE:

#### Module 1: Programmable Infrastructure Overview

- Lesson 1: Digital Enterprise Definition
- Lesson 2: The 4 Pillars of Digitization (IoT, Mobility, Big Data, and Cloud)
- Lesson 3: Digital Disruption
- Lesson 4: What is Network Programmability?
- Lesson 5: What to Automate?
- Lesson 6: Business Benefits of Programmability
- Lesson 7: Simplification
- Lesson 8: Quantifying Programmability
- Lesson 9: Programmability Use Cases

**Module 2: Cisco's Digital Network Architecture (DNA)**

- Lesson 1: The Digital Business
- Lesson 2: Digital Network Architecture Overview
- Lesson 3: Digital Network Architecture Components
- Lesson 4: Benefits of DNA
- Lesson 5: DNA Use Cases
- Lesson 6: Case Study: NYU Security

**Module 3: Cisco Programmable Infrastructure**

- Lesson 1: Programmability
- Lesson 2: UCS
- Lesson 3: Automation
- Lesson 4: Enterprise Networking (APIC-EN, CMX, PI)
- Lesson 5: Open Daylight (RESTCONF, NETCONF)
- Lesson 6: DC Networking (ACI, NX-OS)
- Lesson 7: Software Defined Storage
- Lesson 8: Collaboration (Spark, Tropo, Acano)
- Lesson 9: Management, Monitoring, and Analytics (UCS-D, DCNM)
- Lesson 10: Case Study: AMBU Health Board – Health Care Automation

**Module 4: REST APIs and Python**

- Lesson 1: How API enables Business Automation
- Lesson 2: What is REST?
- Lesson 3: How to make a REST API Call
- Lesson 4: REST API Request and Response
- Lesson 5: Python Basics
- Lesson 6: Python and JSON
- Lesson 7: Using Python with Rest APIs
- Lesson 8: Coding and Parsing with Python
- Lesson 9: Use Case – Creating a List of Users

**Module 5: Spark API**

- Lesson 1: Spark Automation Business Benefits
- Lesson 2: Introduction to Spark API
- Lesson 3: Using Spark API with Python
- Lesson 4: Using Spark API with Postman
- Lesson 5: Use Case – Wi-Fi Public and Guest Access
- Lesson 6: Use Case – Post Message in a Spark Room

**Module 6: Cisco Mobility Experience (CMX) APIs**

- Lesson 1: CMX Programmability Benefits
- Lesson 2: Introduction to CMX 10 Mobility Services
- Lesson 3: CMX 10 Mobility Services REST API
- Lesson 4: CMX Deep Dive using the Notifications Resource
- Lesson 5: Programming CMX Notifications for Applications and 3rd Party Systems
- Lesson 6: CMX/MSE REST API
- Lesson 7: Use Case – Find the IP Address of the WLC
- Lesson 8: Case Study: University of Melbourne – Wi-Fi Analytics

**Module 7: APIC-EM and Rest APIs**

- Lesson 1: APIC-EM Automation Enterprise Benefits
- Lesson 2: Controller Basics
- Lesson 3: APIC-EM Overview
- Lesson 4: APIC-EM Applications and Use Cases
- Lesson 5: APIC-EM REST API Python
- Lesson 6: Application Design for Python with APIC-EM
- Lesson 7: Use Case – Find out the Device Name using the IP Address
- Lesson 8: Case Study: Symantec – Network Automation

**Module 8: RESTCONF, NETCONF, and YANG**

- Lesson 1: Why Models are Important
- Lesson 2: Standard Device Interfaces
- Lesson 3: YANG Data Modeling
- Lesson 4: NETCONF Protocol
- Lesson 5: RESTCONF Protocol
- Lesson 6: Programming with NETCONF and Python
- Lesson 7: Use Case – Create a Python Script to retrieve Interface Stats with NETCONF/YANG and post to Spark

**Module 9: Implementing DevOps**

- Lesson 1: The Transition to DevOps
- Lesson 2: Spark for Human Interactions
- Lesson 3: Trope for Human Interactions
- Lesson 4: NeXt UI Tool Kit
- Lesson 5: Programming using Spark, Trope, and NeXt
- Lesson 6: Use Case – Post Message from a Trope Script to Cisco Spark Spaces

**Lab Outline**

- Lab 1: Python Introduction – Creating a List of Users
- Lab 2: Spark REST API – Create a Room and Invite People – PostMan
- Lab 3: Spark API – Wi-Fi Public and Guest Access – Python
- Lab 4: CMX – Find the IP Address of the WLC
- Lab 5: APIC-EM – Find out the Device Name using the IP Address
- Lab 6: NETCONF – Create a Python Script to retrieve Interface Stats with NETCONF/YANG and Post to Spark
- Lab 7: NeXt UI Tool Kit – Building a Network Topology
- Lab 8: Spark and Trope – Bring together Labs 2 and 5 to create Trouble Ticket Automation

**SUNSET LEARNING INSTITUTE (SLI) DIFFERENTIATORS:**

Sunset Learning Institute (SLI) has been an innovative leader in developing and delivering authorized technical training since 1996. Our goal is to help our customers optimize their cloud technology investments by providing convenient, high quality technical training that our customers can rely on. We empower students to master their desired technologies for their unique environments.

What sets SLI apart is not only our immense selection of trainings options, but our convenient and consistent delivery system. No matter how complex your environment is or where you are located, SLI is sure to have a training solution that you can count on!

**Premiere World Class Instruction Team**

- All SLI instructors have a four-year technical degree, instructor level certifications and field consulting work experience.
- Sunset Learning has won numerous Instructor Excellence and Instructor Quality Distinction awards since 2012

**Enhanced Learning Experience**

- The goal of our instructors during class is ensure students understand the material, guide them through our labs and encourage questions and interactive discussions.

**Convenient and Reliable Training Experience**

- You have the option to attend classes at any of our established training facilities or from the convenience of your home or office with the use of our HD-ILT network (High Definition Instructor Led Training)
- All Sunset Learning Institute classes are guaranteed to run – you can count on us to deliver the training you need when you need it!

**Outstanding Customer Service**

- Dedicated account manager to suggest the optimal learning path for you and your team
- Enthusiastic Student Services team available to answer any questions and ensure a quality training experience
