

Deploying Unified Contact Center Enterprise (DUCCE)

COURSE OVERVIEW

Deploying Cisco Unified Contact Center Enterprise (DUCCE) is a 5-day instructor-led course intended for system engineers and customers who will be involved with day-to-day maintenance and installation of the Cisco Unified Contact Center Enterprise (CCE) product deployed in a CVP comprehensive environment. This course gives the learner an understanding of the Unified CCE deployment capabilities, processes, fault tolerance, installation, and troubleshooting tools for inbound and outbound Contact Center functionality. This will be accomplished by installing and configuring the Unified CCE software and introducing Unified CCE troubleshooting tools.

DUCCE is intended for those installing the solution, or who may be responsible for Level 3 support of the solution. This course also serves as a good stepping-stone for AUCCE Part 1 and AUCCE Part 2, but is not a prerequisite. Students will learn enough about CCE scripting in this course to ensure system functionality only, not become scripting experts.
