

ITIL® Planning, Protection, and Optimization Capability (ITIL PPO)

COURSE OVERVIEW:

ITIL® 2011 edition is comprised of five core publications: Service Strategy, Service Design, Service Transition, Service Operations, and Continual Service Improvement, promoting alignment with the business as well as improving operational efficiency. The official ITIL® qualification scheme describes two streams, the Service Lifecycle Stream and the Service Capability stream.

The Service Lifecycle stream focuses on ITIL practices within the Service Lifecycle context. The prime focus is the Lifecycle itself as well as the use of process and practice elements used within it.

The Service Capability stream is for those who wish to obtain an in-depth understanding of ITIL processes and roles. Attention to the Service Lifecycle is illustrated as part of the curriculum but the primary focus is on the process activities, execution and use throughout the Service Lifecycle.

The ITIL® PPO (Planning, Protection & Optimization) course is part of the ITIL® Intermediate Capability certification stream. The course prepares candidates to take the ITIL® Planning, Protection & Optimization Intermediate exam as well as proving valuable knowledge that can be implemented in the workplace.

WHO WILL BENEFIT FROM THIS COURSE?

IT Managers, Operational staff, and anyone requiring a deeper knowledge of or who are involved in the Planning, Protection & Optimization cluster of processes and functions.
