

# Microsoft Dynamics 365: Finance and Operations Apps Solution Architect (MB-700T00)

## COURSE OVERVIEW

The Dynamics 365 Finance and Operations solution architect is a trusted advisor who consults with organizations and implementation team members to refine business needs into a well-defined and cost-effective solution. The architect is accountable for the integrity and successful delivery of the complete solution design. The architect provides critical guidance and support from pre-sales throughout the remainder of the project lifecycle. They have great breadth of knowledge and experience designing solutions that meet business needs. The solution architect may have a technical, functional, or industry background. The solution architect must demonstrate knowledge of all Dynamics 365 apps and Power Platform. They must have deep understanding of Finance and Operations apps. In addition, they have extensive domain knowledge in one or more industry verticals. This course is designed to prepare those who are aspired to be solution architects and those who are new to this role to learn more about the technical information that solution architects will be dealing with during implantation.

## WHO WILL BENEFIT FROM THIS COURSE?

The audience for this course should have previous experience with functional or technical focus in Dynamics 365: Finance and Operations Applications. Primarily for those who are aspired to be solution architect role.

## PREREQUISITES

You must complete the following learning paths before attending this instructor led training:

- Architect solutions for Dynamics 365 and Power Platform - Learn | Microsoft Docs
- Use Success by Design for Unified Operations apps solutions - Learn | Microsoft Docs

## COURSE OBJECTIVES

Students will Learn:

- Becoming a solution architect for Dynamics 365 and Microsoft Power Platform
- Discover customer needs as a Solution Architect for Dynamics 365 and Microsoft Power Platform
- Propose a solution as a Solution Architect for Microsoft Power Platform and Dynamics 365
- Work with requirements for Microsoft Power Platform and Dynamics 365
- Perform fit gap analysis
- Get started with Lifecycle Services for finance and operations apps
- Design and plan an implementation of finance and operations apps
- Translate Dynamics 365 apps and documentation with Dynamics 365 Translation Service
- Prepare data for migration to finance and operations apps

• Work with data management in finance and operations apps

- Perform user acceptance testing in finance and operations apps
- Get started with a finance and operations implementation project
- FastTrack Customer Success Program for finance and operations
- Implement application lifecycle management in finance and operations apps
- Explore extensions and the extension framework in finance and operations apps
- Consume business events in finance and operations apps
- Identify data integration patterns and scenarios in finance and operations apps
- Data integrations with finance and operations apps
- Work with analytics and reporting in finance and operations apps
- Describe the business value of the Microsoft Power Platform
- Identify foundational components of Microsoft Power Platform
- Design and build mobile apps for finance and operations apps
- Updates and upgrades for finance and operations apps
- Work with performance and monitoring tools in finance and operations apps
- Plan and implement security in finance and operations apps
- Implement role-based security in finance and operations apps
- Prepare to go-live with finance and operations apps
- Feature management in finance and operations apps
- Get started with Success by Design for Dynamics 365
- Create a solution blueprint for Dynamics 365 solutions
- Plan a testing strategy for your Dynamics 365 solution
- Design data models for Dynamics 365 solutions
- Business intelligence and analytics design for Dynamics 365 solutions
- Gap solution design for Dynamics 365 solutions
- Create a data migration strategy for Dynamics 365 solutions
- Review the security model for your Dynamics 365 solutions
- Integration design for Dynamics 365 solutions
- Dual-write implementation for Dynamics 365 solutions
- Implement a performance strategy for Dynamics 365 solutions
- Cutover strategy for Dynamics 365 solutions
- Post go-live strategy for Dynamics 365 solutions
- Get started with configuration and personalization in Finance and Operations apps
- Configure your user interface in Finance and Operations apps
- Configure your data in Finance and Operations apps

## COURSE OUTLINE

Module 1 : Becoming a solution architect for Dynamics 365 and Microsoft Power Platform

Learn about what is expected of a solution architect.

Learn about the role of a solution architect during the project phases.

Module 2 : Discover customer needs as a Solution Architect for Dynamics 365 and Microsoft Power Platform

Learn about initial customer discovery.

Discover customer communication strategies.

Module 3 : Propose a solution as a Solution Architect for Microsoft Power Platform and Dynamics 365

Identify solution components.

Develop and validate a demo.

Module 4 : Work with requirements for Microsoft Power Platform and Dynamics 365

Learn about leading requirement capture sessions.

Learn about functional and non-functional requirements.

Module 5 : Perform fit gap analysis

Determine feasibility of requirements.

Refine requirements from proof of concept insights.

Categorize business requirements and perform a fit gap analysis.

Evaluate Dynamics 365 and Microsoft Power Platform apps.

Module 6 : Get started with Lifecycle Services for finance and operations apps

Understand the functionality and tools of Lifecycle Services for finance and operations apps

Reuse existing assets, copy and share data

Understand Task recorder functionality

Create a business process model

Identify and analyze gaps using the Business Process Modeler

Run the Issue Search tool and analyze results

Module 7 : Design and plan an implementation of finance and operations apps

Prepare documentation for gathered requirements by using methodologies in Lifecycle Services.

Define use case scenarios.

Learn how to participate in the creation of Business requirement documents (BRD).

Understand the importance of creating and maintaining documented processes.

Participate in phase-based planning processes and solution design.

Describe the future state business processes based on a proposed solution.

Determine when to build versus buy.

Create Functional Design Documents (FDD).

Module 8 : Translate Dynamics 365 apps and documentation with Dynamics 365 Translation Service

Learn about the functionality and features of Dynamics 365 Translation Service.

Submit translation requests for user interface and documentation files of supported Dynamics 365 products.

Review and edit a translation request's output to regenerate new translations.

Use the Align tool to create translation memory for future translation requests.

Module 9 : Prepare data for migration to finance and operations apps

Choose a data integration (import/export) strategy.  
Identify common migration scenarios and tools in finance and operations apps.  
Understand the Bring your own database (BYOD) feature.  
Identify relevant (legacy) systems.  
Identify and import static data that is common between industries.  
Create and review test plans for data migration.  
Identify and extract source data.  
Identify relevant data entities and elements.  
Generate field mapping between source and target data structures.  
Test a data migration and validate output.  
Support the transition between the existing and migrated systems.  
Module 10 : Work with data management in finance and operations apps

Identify the correct pattern for a given scenario to use the Data management platform for integration by using data entities.  
Work with the Data management workspace.  
Export data from a legal entity.  
Import data into a legal entity.  
Work with data import and export jobs.  
Clean up the staging tables.  
Work with database movement operations.  
Work with the data sharing framework.  
Module 11 : Perform user acceptance testing in finance and operations apps

Test cases and business requirements  
Best practices for recording test cases  
Task recorder  
How to create a BPM library  
How to synchronize and configure your test plan in Azure DevOps  
How to run test cases manually and automatically  
The Regression suite automation tool (RSAT)  
Module 12 : Get started with a finance and operations implementation project

Learn about the implementation journey for a successful finance and operations project.  
Identify the different phases of a finance and operations implementation.  
Module 13 : FastTrack Customer Success Program for finance and operations

Learn the benefits of being part of the FastTrack program for the success of your implementation.  
Discover the engagement level from the Microsoft FastTrack team with your project.  
Define the roles that are needed for a finance and operations implementation.  
Learn about the resources that will support your project.  
Learn how to become a FastTrack recognized solution architect.  
Module 14 : Implement application lifecycle management in finance and operations apps

Define ALM.

Learn about the different ALM methodologies.

Build models.

Create a project plan for building and testing solutions.

Create processes for release management, change management, and risk management.

Module 15 : Explore extensions and the extension framework in finance and operations apps

Learn about the reasons for creating extensions.

Determine when to use the extensibility request form.

Learn about the risk of intrusive customizations.

Develop code that will extend the functionality of finance and operations apps.

Implement the SysOperationSandbox framework.

Module 16 : Consume business events in finance and operations apps

Learn about the business events framework.

Implement new business events through class extension.

Business events in Microsoft Power Automate.

Role based security for business events.

Module 17 : Identify data integration patterns and scenarios in finance and operations apps

Identify integration web application programming interfaces.

Explore available data integration scenarios.

Identify the key differences between synchronous and asynchronous integrations.

Module 18 : Data integrations with finance and operations apps

Set up a data project.

Set up a recurring data job.

Define authorization for integrations by using OAuth.

Monitor the status and availability of entities.

Develop data transformations.

Use Microsoft Dataverse to synchronize entities between Dynamics 365 applications.

Use composite data entities.

Integrate composite data entities.

Export composite data entities.

Learn about Azure Data Lake and Entity Store, and how to change data in Azure Data Lake

Learn about Microsoft Power Platform convergence.

Module 19 : Work with analytics and reporting in finance and operations apps

Different types of reports and inquiries in finance and operations apps

Financial reporting

Configuring finance and operations apps for Microsoft Power Platform

Generating and consuming inquiries and reports

Module 20 : Describe the business value of the Microsoft Power Platform

Examine Microsoft Power Platform.  
Describe the business value of the Power Platform.  
Explore connectors in Power Platform.  
Review using Microsoft Dataverse to organize business data.  
Examine how Power Platform works together with Microsoft 365 apps and services.  
Explore solutions using Power Platform Microsoft Teams.  
Describe how Power Platform works with Dynamics 365.  
Describe how Power Platform solutions can consume Azure Services.  
Explore how Power Platform apps work together to create solutions.  
Module 21 : Identify foundational components of Microsoft Power Platform

Examine the different Power Platform administrative options available.  
Describe security and governance in Power Platform.  
Explore Microsoft Dataverse and how to use it to build business solutions.  
Examine Power Platform connectors.  
Module 22 : Design and build mobile apps for finance and operations apps

The Microsoft Dynamics 365 Unified Operations mobile app  
Use cases for mobile apps  
How to build and work with workspaces  
Module 23 : Updates and upgrades for finance and operations apps

How to upgrade from Dynamics AX legacy (AX 2012 and AX 2009).  
How to update from earlier finance and operations versions 7.0, 7.1, 7.2, 7.3, and 8.0 to version 10.  
Module 24 : Work with performance and monitoring tools in finance and operations apps

Diagnose performance issues by using Trace parser.  
Explore load testing by using the Performance SDK.  
Monitor performance by using the SQL Insights dashboard.  
Monitor server Health metrics in Microsoft Dynamics Lifecycle Services.  
Module 25 : Plan and implement security in finance and operations apps

Understand security architecture of finance and operations apps  
Learn about encryption in finance and operations apps  
Manage users  
Manage security  
Apply segregation of duties  
Run security reports  
Stay compliant with user licensing requirements  
Module 26 : Implement role-based security in finance and operations apps

Create and modify roles, duties, privileges, and permissions.  
Review the role-based security hierarchy.

Use and enforce permissions policies.

Define the extensible data security framework (XDS).

Apply security permissions.

Stay compliant with user licensing requirements

Module 27 : Prepare to go-live with finance and operations apps

Prepare for go-live

Complete the Microsoft Dynamics Lifecycle Services methodology

Perform User acceptance testing (UAT) for your solution

Understand the FastTrack Go-live assessment

Request the production environment

Module 28 : Feature management in finance and operations apps

Learn about the Feature management workspace in finance and operations apps.

Discover when and how to enable features, including how to disable and reschedule features.

Learn how to check for feature updates and assign roles.

Module 29 : Get started with Success by Design for Dynamics 365

Learn how to use FastTrack techniques on your own project.

Review the Success by Design processes and workshops.

Identify the different phases of a project.

Discover the available tools for tracking project progress.

Module 30 : Create a solution blueprint for Dynamics 365 solutions

Learn how to identify project goals

Learn about the project's tenant strategy

Consider any non-functional requirements

Learn how to prepare, and conduct the Solution blueprint workshop

Module 31 : Plan a testing strategy for your Dynamics 365 solution

Identify measurable and non-measurable testing goals and results.

Plan the entire testing strategy for an engagement.

Learn how to prepare and conduct the Test strategy review workshop.

Module 32 : Design data models for Dynamics 365 solutions

Learn about data modeling in Dynamics 365.

Review data modeling best practices and learn how they are related to a Dynamics 365 project.

Module 33 : Business intelligence and analytics design for Dynamics 365 solutions

Learn about the Business intelligence and analytics design workshop

Prepare for the Business intelligence and analytics design workshop

Learn how to conduct the Business intelligence and analytics design workshop

Module 34 : Gap solution design for Dynamics 365 solutions

Learn about the Gap solution design workshop

Prepare for the Gap solution design workshop

Learn how to conduct the Gap solution design workshop

Module 35 : Create a data migration strategy for Dynamics 365 solutions

Learn about the best practices of data migration.

Discover how data migration relates to and can affect a project.

Learn how to prepare and conduct the Data migration strategy workshop.

Module 36 : Review the security model for your Dynamics 365 solutions

Evaluate the proposed security model.

Provide feedback and recommendations that highlight technical risks and issues.

Module 37 : Integration design for Dynamics 365 solutions

Learn about connecting one or more components to create a unified experience.

Discover the process of integrating existing services without migrating or rebuilding.

Module 38 : Dual-write implementation for Dynamics 365 solutions

Learn about the Dual-write implementation workshop

Prepare for the Dual-write implementation workshop

Learn how to conduct the Dual-write implementation workshop

Follow up after the Dual-write implementation workshop

Module 39 : Implement a performance strategy for Dynamics 365 solutions

Learn about the Solution performance review.

Prepare for the Solution performance workshop.

Define performance benchmarks and success criteria.

Learn how to conduct the Solution performance workshop.

Module 40 : Cutover strategy for Dynamics 365 solutions

Learn about the Cutover strategy workshop

Prepare for the Cutover strategy workshop

Learn how to conduct the Cutover strategy workshop

Follow up after the Cutover strategy workshop

Module 41 : Post go-live strategy for Dynamics 365 solutions

Learn about the Post go-live workshop

Prepare for the Post go-live workshop

Implement the Post go-live workshop

Follow up after the Post go-live workshop

Module 42 : Get started with configuration and personalization in Finance and Operations apps

Log into your environment

List several ways the environment can be customized without coding

Add a menu item to favorites

Explain how different roles see different dashboards

Add a KPI to a dashboard workspace

Modify the fields in a form

Modify the fields in a report

Module 44 : Configure your data in Finance and Operations apps

Modify an entity

Add security to a user

Download data to Excel, update, and upload

---

## WHY TRAIN WITH SUNSET LEARNING INSTITUTE?

Sunset Learning Institute (SLI) has been an innovative leader in developing and delivering authorized technical training since 1996. Our goal is to help our customers optimize their technology Investments by providing convenient, high quality technical training that our customers can rely on. We empower students to master their desired technologies for their unique environments.

What sets SLI apart is not only our immense selection of trainings options, but our convenient and consistent delivery system. No matter how complex your environment is or where you are located, SLI is sure to have a training solution that you can count on!

### Premiere World Class Instruction Team

- All SLI instructors have a four-year technical degree, instructor level certifications and field consulting work experience
- Sunset Learning has won numerous Instructor Excellence and Instructor Quality Distinction awards since 2012

### Enhanced Learning Experience

- The goal of our instructors during class is ensure students understand the material, guide them through our labs and encourage questions and interactive discussions.

### Convenient and Reliable Training Experience

- You have the option to attend classes live with the instructor, at any of our established training facilities, or from the convenience of your home or office
- All Sunset Learning Institute classes are guaranteed to run – you can count on us to deliver the training you need when you need it!

### Outstanding Customer Service

- You will work with a dedicated account manager to suggest the optimal learning path for you and/or your team

• An enthusiastic student services team is available to answer any questions and ensure a quality training experience
